RANDY TASCHNER

randelmt@gmail.com   720 437 1569   portfolio.randytaschner.com

Having a knack for deconstructing and simplifying problems has helped me in many areas. It has served me well in refining solutions, communicating and teaching others. Being aware of my strengths and weaknesses is very important to me, I believe knowing yourself is a key role in personal and professional development.

Currently my strengths reside in **UI / UX** and **front end development**. Over the past year I have spent a lot of time expanding my abilities in **ES6**, **REACT** and **Node.js**. My goals are to take my design background and accompany it with a solid ability to program. I have acquired a favorable understanding of these skills by doing side projects and online courses.
